## THE PHOENIX SINGS A SONG, BY SHUKLA CHOWDHURY

Artist-speak, "The Phoenix Sings a Song whenever it encounters the richness of nature. These songs reveal to the Phoenix and to the viewer too, that there is a hidden beauty in everything and everyone. One needs to search. One needs to look beyond the surface, because underneath the surface exists a wonderful world, untouched and beautiful. The Phoenix, through its songs, conveys that aesthetic beauty is not the only means of being attractive. We seldom realise that inner beauty matters far more than outer beauty. What we see is not always true. It's when we assimilate and absorb what we see that we become aware of the true beauty of all existence. The songs the Phoenix sings are in

commemoration and appreciation of the diversity of nature. It is indeed refreshing to view life from a different perspective, a perspective in which even the unattractive reveals its beauty to the beholder."
